VINASEED'S HISTORY

R&D ACTIVITIES

Vinaseed is the first science and technology enterprise in Vietnam's plant seed industry, pioneering in research, application and technology transfer with breakthrough, ahead and market-oriented solutions. Vinaseed VRDC Research and Development Center has the functions of scientific research, application, technology transfer, human resource training, and scientific research cooperation in the field of plant varieties. The Center has 03 main research facilities in Cu Chi (HCMC), Co Do (Can Tho), Khoai Chau (Hung Yen), and 02 biotechnology rooms with 220 hectares for research. A strong team of research and development experts, over 1,000 employees with 80% having university and post-graduate degrees have constantly strived to make a difference in products and technology as the foundation for improvement, competing capability. Over the years, the company has researched and successfully transferred 45 plant varieties of all kinds, of which 4 are in the TOP 10 most popular rice varieties in Vietnam, bringing people valuable products, large growth, safe for human health and the environment.
